

What is gesture drawing?

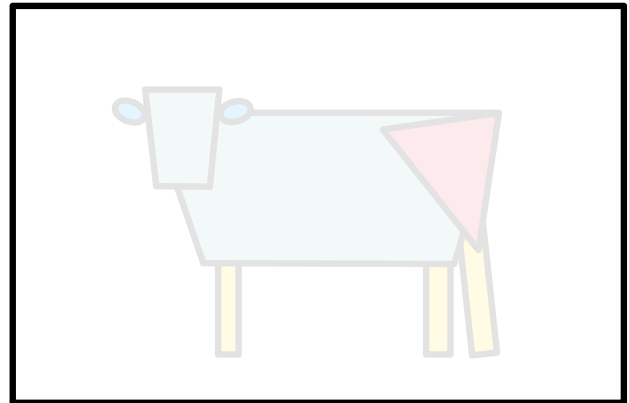

It is a *fast* drawing that shows motion and expression.

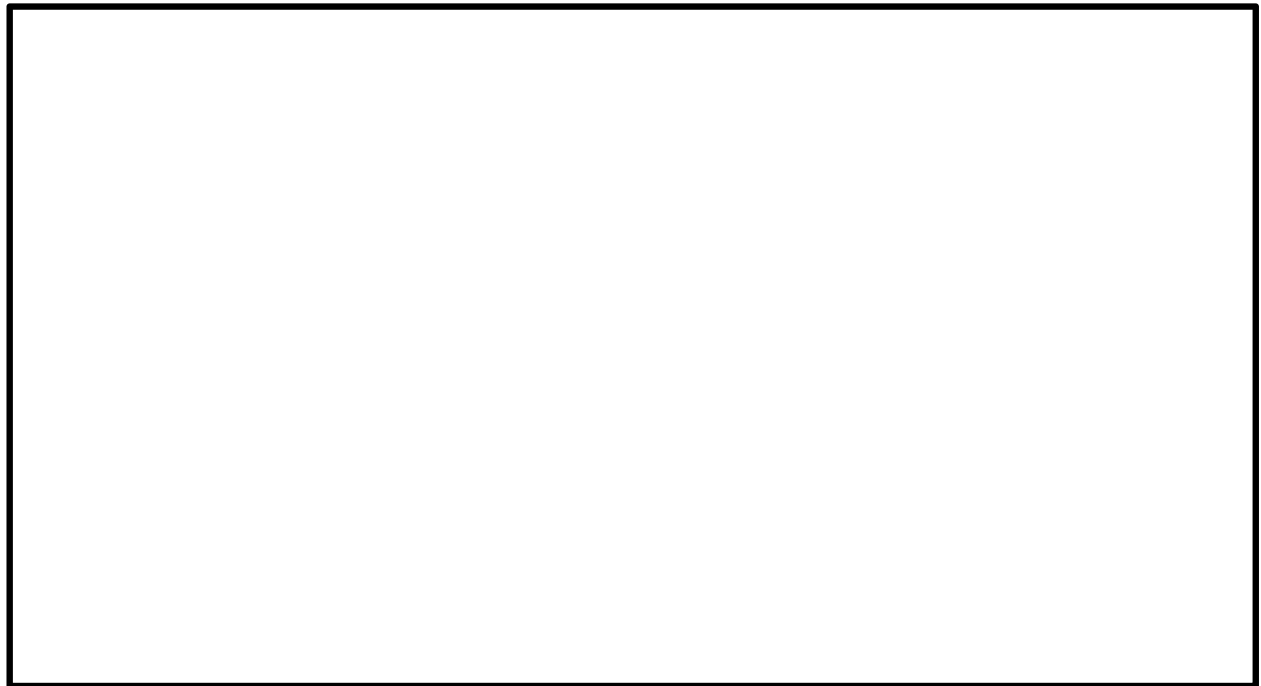

Try it out ~

1. All animals are made of basic shapes. How many shapes do you see in this picture?

2. Trace the shapes that you see in the Ox. Compare how big and small the shapes are. How much space is in between each shape?

3. Finally, let's try gesture drawing! Lightly redraw the shapes you made in step 2, then add in the details you see later. Time yourself so you only get 5 minutes to draw.

Bonus See if you can draw the ox in 2 minutes. Is there a difference if you take 10 minutes to draw it?
